

Cartes de répartition des espèces au 06/05/2024 :

Vous allez consulter les cartes de répartition des espèces du Gard, proposant le pointage des observations validées ou pas encore validées : de ce fait il y a certainement des erreurs qui seront corrigées au fil de l'avancée du projet.

Les cartes présentent des points rouges et des points bleus : les premiers sont les mentions antérieures à l'année 2010, les seconds sont les observations contemporaines (depuis 2010 inclus).

Observateurs :

Nous avons le plaisir de remercier les observateurs qui ont contribué à la connaissance des papillons du Gard. Certains ont partagé directement leurs observations dans l'Observatoire du Patrimoine Naturel du Gard, d'autres utilisent l'application Observado développée par nos collègues des Pays-Bas, et un troisième lot provient d'échanges de données avec le projet d'Atlas des papillons de jour et libellules du Languedoc Roussillon, jusqu'à 2014 inclus.
